

As a flight attendant, I am against the use of cell phones use aboard airborne aircraft. This is a time for our Customers to relax, sleep, read, do crafts, unwind from the day, without the interference of people talking on cell phones. Some people are not aware of how LOUD they are talking on their cell phones, as a result of this flight attendants will be forced to become referee's by requesting to people to not to talk so LOUD, stop arguments, etc. Please for the safety of our Customer and crew member, please do not vote to allow this banned to be passed.
